UTILITY, STATUS & HOLDER RECOGNITION

HOLDER RECOGNITION

XDRIP token holdings may unlock recognition-based perks under the current collection rules.

These benefits are documented XDRIP Universe utility — not revenue share, investment return, dividends, ownership interest, or governance rights.

Eligibility, availability, and scope may evolve. Always refer to the current documentation before participating.

LEGAL & UTILITY NOTICE

Medals of Honor DOTs are digital collectibles and utility records.

What a DOT is

- A blockchain-anchored collectible record with verifiable provenance.
- A utility key for documented access, perks, discounts, recognition, and events under current collection rules.
- A personal utility feature that may change, be limited, suspended, or retired based on project rules, eligibility, operations, or applicable law.

What a DOT is not

- Not company ownership or a claim on XDRIP Digital Management LLC or its assets.
- Not a financial instrument or security.
- No dividends, profit share, revenue rights, holder payments, governance, or voting rights.
- No promise of return or appreciation.

Common through Legendary are non-transferable, except transfer to a designated beneficiary upon the holder's death. The Eternal founder-level license is fully transferable.

OWNERSHIP & TRANSFERABILITY

STANDARD TIERS

Common through Legendary are personal, non-transferable utility collectibles. They cannot be sold, traded, or reassigned, except to a designated beneficiary upon the holder's death.

THE ETERNAL

A fully transferable founder-level license that may be forged independently of the standard tiers.

PROGRESSION & PERKS

Progression remains with the original forger's wallet. Perks follow the wallet currently holding the Medal. If Medals are split across wallets, each wallet receives only the utility linked to its holdings.

HOLDER RESPONSIBILITY

Keep every holding wallet secure and review current collection rules before participating. Unauthorized transfers may terminate associated perks.

NO HOLDER ECONOMICS

DOTs are participatory utility collectibles, not financial products. They provide no external market value, dividends, revenue share, company ownership, board seats, voting rights, or assurance of returns.
